RAWNAZ ANAM

SENIOR SOFTWARE ENGINEER | .NET - Angular - Enterprise Integrations

anamraz.github.io | linkedin.com/in/rawnazanam | github.com/AnamRaz

PROFESSIONAL SUMMARY

Software engineer with 10+ years in professional software and web development, beginning with Joomla projects in 2015. Strengths include C#/.NET, TypeScript/Angular, APIs, and enterprise integrations. Owns application delivery and production support, with architecture guidance and code reviews.

PROFESSIONAL EXPERIENCE

Senior Software Developer May 2022 - Present

Harrington Hoists, Inc. - a Columbus McKinnon company | Manheim, PA

- Built QuickNet's Electron-based application and frontend, with proficient TypeScript development.
- Create Nucleus APIs for QuickNet and REST APIs enabling Nucleus/JDE integration.
- Built company MVC web applications including Hub and Smart Source, a customer-facing warranty claims platform.
- Built an Angular web/PWA successor with .NET APIs and a local Windows helper for printing and file workflows; modernization and production rollout are not yet complete.
- Own application development and production support; develop and maintain 30+ ERP and workflow automations.
- Guide two developers through architecture discussions, code reviews, testing, and production troubleshooting.

Application Developer Feb 2021 - May 2022

Dutch Valley Food Inc. | Myerstown, PA

- Developed .NET applications, database-driven tools, reports, and integrations supporting daily business operations.
- Automated manual processes and improved the reliability of systems used by operational teams.

Freelance Web Application Developer 2015 - 2021

Independent Projects | Remote / Pennsylvania

- Began professional web development with Joomla projects in 2015; built websites and web applications for small businesses, covering requirements, interface updates, deployment, and client support.

Earlier experience: Help Desk / Customer Service Representative, Vertical Screen | May 2017 - Feb 2021. Freelance development was project-based and overlapped with this role.

INDEPENDENT COMPANY & PRODUCT DEVELOPMENT

Founder & Software Engineer 2025 - Present

ATARVI | Independent software company

- Building a restaurant operations product in active development and pilot preparation using .NET 10, Blazor, EF Core, SQL Server, and Azure.
- Designing inventory, recipe, OCR-assisted receipt review, scheduling, and multi-location reporting workflows with role-based access.
- Own architecture, implementation, operator feedback, Azure deployment preparation, and pilot readiness.

TECHNICAL SKILLS

Application development: C#, .NET, TypeScript, Angular, ASP.NET Core, MVC, Electron, Blazor, JavaScript, EF Core
Data & integrations: SQL Server, Oracle, REST APIs, OpenAPI/Swagger, JDE EnterpriseOne, JDE Orchestrator
Cloud & delivery: Azure App Service, Azure SQL, Blob Storage, Key Vault, Application Insights, GitHub Actions
Engineering: Authentication/authorization, multi-tenant design, background processing, code review

EDUCATION

B.S. Information Science and Technology Dec 2020

Temple University | Philadelphia, PA
